

Food Waste Action Group

November 2020

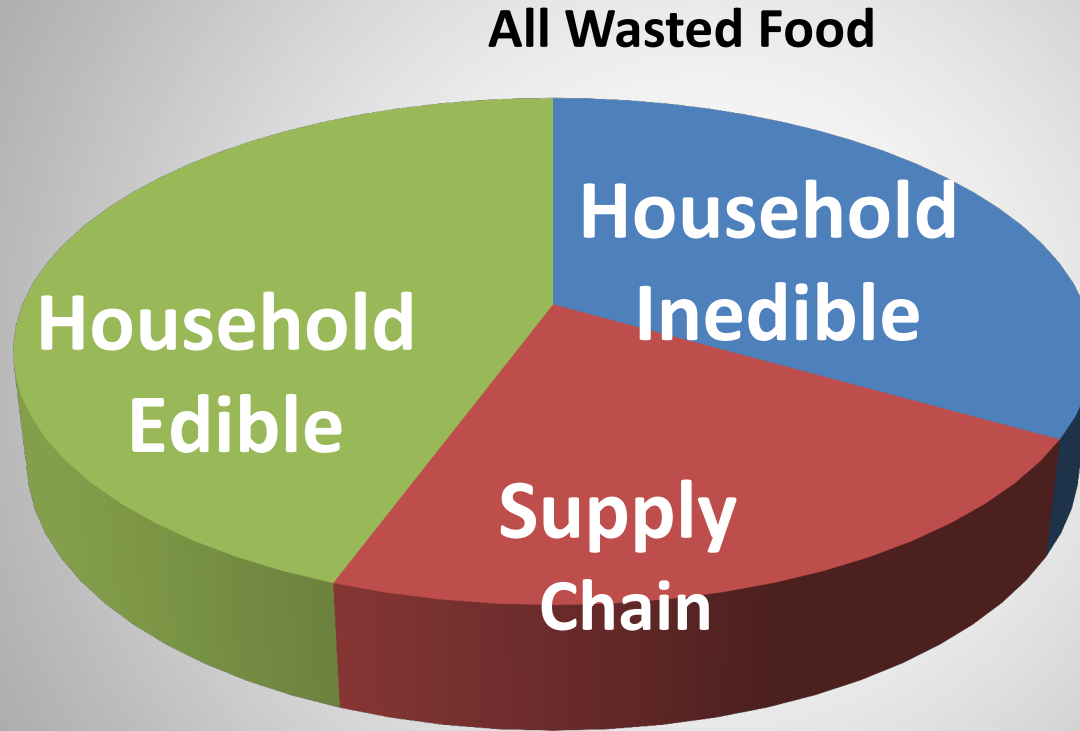

Annual Climate Crisis Meeting

How Serious is the Waste?

Between 33%
and 40% of
human food
supply!

Households Are a Major Player

2/3 of total food waste occurs in our households

2/3 of household food waste was or is edible!!

Fifteen Percent of the Energy Consumed in the US is Used to Produce Food!

For What?

fertilizer

irrigation

**planting, pest
control,
harvesting**

**heating,
cooling,
ventilation**

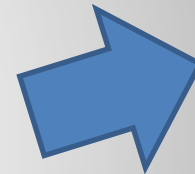

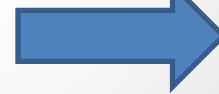

As if that isn't enough,

carbon (C)

no oxygen

methane
CH₄

carbon
dioxide
CO₂

Reducing Food Waste Means

- less wasted energy
- less methane and carbon dioxide production
